E-07580 Capdepera
Islas Baleares

Integrated Learning

The shortest route to language
learning success

Integrated Learning:

The Flying Teachers® teaching concept consists of three mutually aligned elements. These enable students to combine course content and methods, and directly put the language being learned into practical use.

Basic course

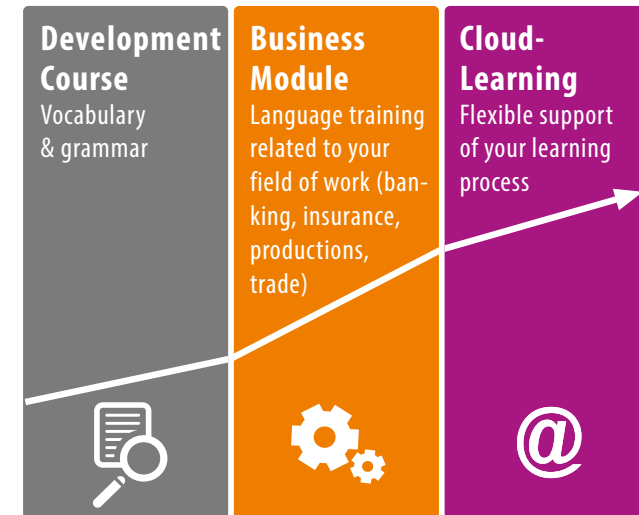

Every Flying Teachers® course contains a core element in which basic language competences required for a broad development of language are taught.

Business Module

In line with student needs, the basic course can be complemented with modules based on and tailored to the specific professions of the course participants. For example, this could contain specialist vocabulary for engineers, social skills and presentation techniques for sales staff, etc.

Cloud Learning

A further level of tailoring is offered by cloud learning. This enables solutions that are tailored to the specific needs of individual students, and can be applied flexibly.
